Professional Summary

Computer Science Engineering graduate with experience in building **full stack applications** and **RESTful APIs** using the **MERN stack**. Proficient in **Node.js**, **Express.js**, **MongoDB**, **React.js**, and **MySQL**. Seeking a **Junior Software Engineer** role.

Technical Skills

Programming Languages: JavaScript (ES6+)
Backend Technologies: Node.js, Express.js, RESTful API design, JWT Authentication
Databases: MongoDB (NoSQL), MySQL (SQL)
Frontend Technologies: HTML, CSS, React.js
Tools & Platforms: Git, GitHub, Postman (API testing), VS Code

Projects

Smart Bus Availability Checking System

Jan 2025

- Developed a **full stack bus management platform** using the **React.js**, **Node.js**, **Express.js**, and **MongoDB**.
- Built a modern **Single Page Application (SPA)** with responsive UI, optimized routing, and reusable frontend components using **React/Vite**.
- Integrated an **AI-powered chatbot** using **Llama 3.1** with backend validation, **fuzzy search**, and **database-driven filtering** for accurate route recommendations.
- Implemented advanced backend features including **RESTful APIs**, **dynamic fare calculation**, **time based bus filtering**, and route validation logic.
- Designed a secure **Admin Dashboard** with **CRUD operations** for managing buses, routes, schedules, and real time stop updates.

Movie Discovery Platform

Apr 2026

- Architected scalable **server side applications** using **Node.js** and **Express.js**, and designed optimized **MongoDB/Mongoose schemas** for users, movies, watchlists, and discussion systems.
- Implemented advanced **search and trending algorithms** inspired by **HN style decay ranking**, along with optimized **NoSQL queries** for efficient content retrieval.
- Built robust **RESTful APIs** with advanced **TMDB API integration**, including **IPv4 forced requests**, retry backoff strategies, structured error handling, and fallback mock responses.
- Improved backend performance using **Node cache** with custom **TTL caching strategies**, reducing redundant external API calls and database lookups.
- Developed secure authentication and authorization using **JWT access tokens**, **HTTP only refresh cookies**, **role based access control**, and custom email workflows with the **Brevo API**.
- Built a modern movie platform using **React 19**, **Tailwind CSS v4**, **Framer Motion 12**, and **PWA integration**, while following collaborative **Git workflows** and deployment practices.

Education

APJ Abdul Kalam Technological University, Kerala, India
Bachelor of Technology in Computer Science & Engineering

2022 – 2026
